—With one of those sudden transitions for which the weather in this section of the country is noted, it changed within 24 hours from the balmy warm summer to the first harbinger of what promises to be a long, cold winter and Sunday night, September 27th, a slight frost, the first of the season, fell. Those who hadn't sensed Jack Frost's approach awoke Monday morning to find their tomatoe plants nipped by his icy clutches. Heavy bed covers and winter overcoats were in demand, and the "old man" was ordered to put up the stoves. Nutting and pawpaw parties are now the rage, for with the first frost these delicacies are in order. In low places sheet ice was formed and the late corn felt the touch of Mr. Frost.

For fire and tornado insurance in town and country. There never was a time when you should watch your insurance closer. Why? Because of the high price of lumber. See that your insurance is well distributed and calls for proper amounts on each class of property, and have a clear contract that this is to be done for a stated amount of money, for a certain period. Don't go it blind or wide open. Our courts are full of trouble of this kind. I have both phones at office and residence. Can also read writing, and I never refuse to talk when I am paid for it. We found Mrs. Gelvin hard at work and to judge from the expression of her face she is enjoying her new home. We congratulate our neighbors.—Forest City News.
